

# SAFETY FOOTWEAR SOLUTIONS

## GENERAL APPLICATION

Our range of protective footwear is manufactured as per Indian and International standards and are available in different styles. Safety toe cap, moulded high density foot bed, anti-bacterial and anti-fungal treated uppers are standard features along with optional features like ESD properties, puncture resistant mid sole, etc. are available across the range.

## PU SOLE

The most basic in our range of safety shoes, these products with a PU sole offer good grip, flexibility and resistance to abrasion. These are available in a choice of leather and speciality fabric upper designs.

### CLOVE™

FCA

This is the most basic footwear made with split barton upper, PU sole, steel toecap with non-woven and Cambrelle® lining.

### KOKAM™

FDA

These shoes, made with corrected grain upper, PU sole, steel toecap, with non-woven and Cambrelle® lining and extra padded collar are preferred for enhanced comfort.

### PEPPERMINT™

FHA

These shoes are made with a combination of special woven fabric and suede leather upper for added comfort, breathability and light weight. These shoes with single density PU sole and safety toe cap are gaining popularity among users.

## PREMIUM PU SOLE

The most popular in our range of safety shoes, these products are made with an injection moulded single or double density PU sole and are available in various styles, upper qualities and optional safety features.

### GINGER™

FAA

Made with premium quality PU sole, these shoes are available in a choice of split and corrected grain uppers. These shoes are featured with a safety toe cap and high quality non woven and Cambrelle® lining materials.

### GINGER™ PLUS

FAB

Made with premium quality double density PU sole for excellent abrasion resistance, these shoes are available in a choice of split barton and corrected grain uppers. These shoes are featured with a safety toe cap and high quality non woven and Cambrelle® lining materials.

## PEPPERMINT™ PLUS

FHB

Made with a specialized woven fabric and suede leather upper, premium PU sole and safety toe cap, these shoes are one of the most light weight, comfortable and easy to maintain. These are available in premium single and double density PU sole options.

## REINFORCED PU SOLE

The latest in our range of safety shoes, these products made with an injection moulded dual density PU/TPU sole offer excellent protection from abrasion and provides improved grip, flexibility, thermal and chemical resistance.

### TAMARIND™

FGA

The most popular style in European countries, these "all terrain" shoes are available in microfiber and fabric upper options, padded with premium quality materials. Featured with our advanced double density PU/TPU sole, these shoes are also available with steel and composite toe cap options.

### WASABI™

FAB

These shoes, available in split barton and corrected grain upper options feature our advanced dual density PU/TPU soles. These are available in a choice of different style with steel and composite toe cap options.
