

## MAYFLY™

Mayfly™ range of protective clothing are specially designed to shield ESD sensitive devices from harmful static charges, generally associated with clean room and dry working conditions. The Mayfly™ range has been manufactured with textile materials tested and certified for ESD applications as per EN 1149-5:2009 and EN 340:2006. Available in different style and colour options, these garments are popularly used in electronic, communications and pharmaceutical industries.
